

# Working Together for Better Kidney Health

## Our vision

People affected by kidney disease in BC have access to a network of the highest quality, person-centred care, enabling them to live their lives to the fullest.

## Our purpose

BC Renal is responsible for the planning, coordination and financial stewardship of outstanding, equitable kidney care, and acts as a catalyst for research, knowledge translation and innovation for people in BC.

## Foundational Principles

- Equitable & Optimal, People-Centered Care
- Indigenous Wellness
- Planetary Health

Unique in Canada and internationally, the BC renal network includes:

- BC Renal and provincial committees
- 5 regional renal programs
- 1 provincial children's renal program
