

PERSONALIZED HEALTH CARE: DIFFERENT FOR EVERY PATIENT

**Fiona Dalton, President & CEO
Providence Health Care**

November 2, 2018

YOUR TURN TO PARTICIPATE

WHAT IS PERSONALIZED HEALTH CARE?

- A) It provides the genomic blueprint to determine each person's unique disease susceptibility, defines preventive measures and enables targeted therapies to promote wellness.

- B) It addresses the specific psychosocial needs of each unique patient and recognizes that each patient has different needs in order to achieve optimum wellness.

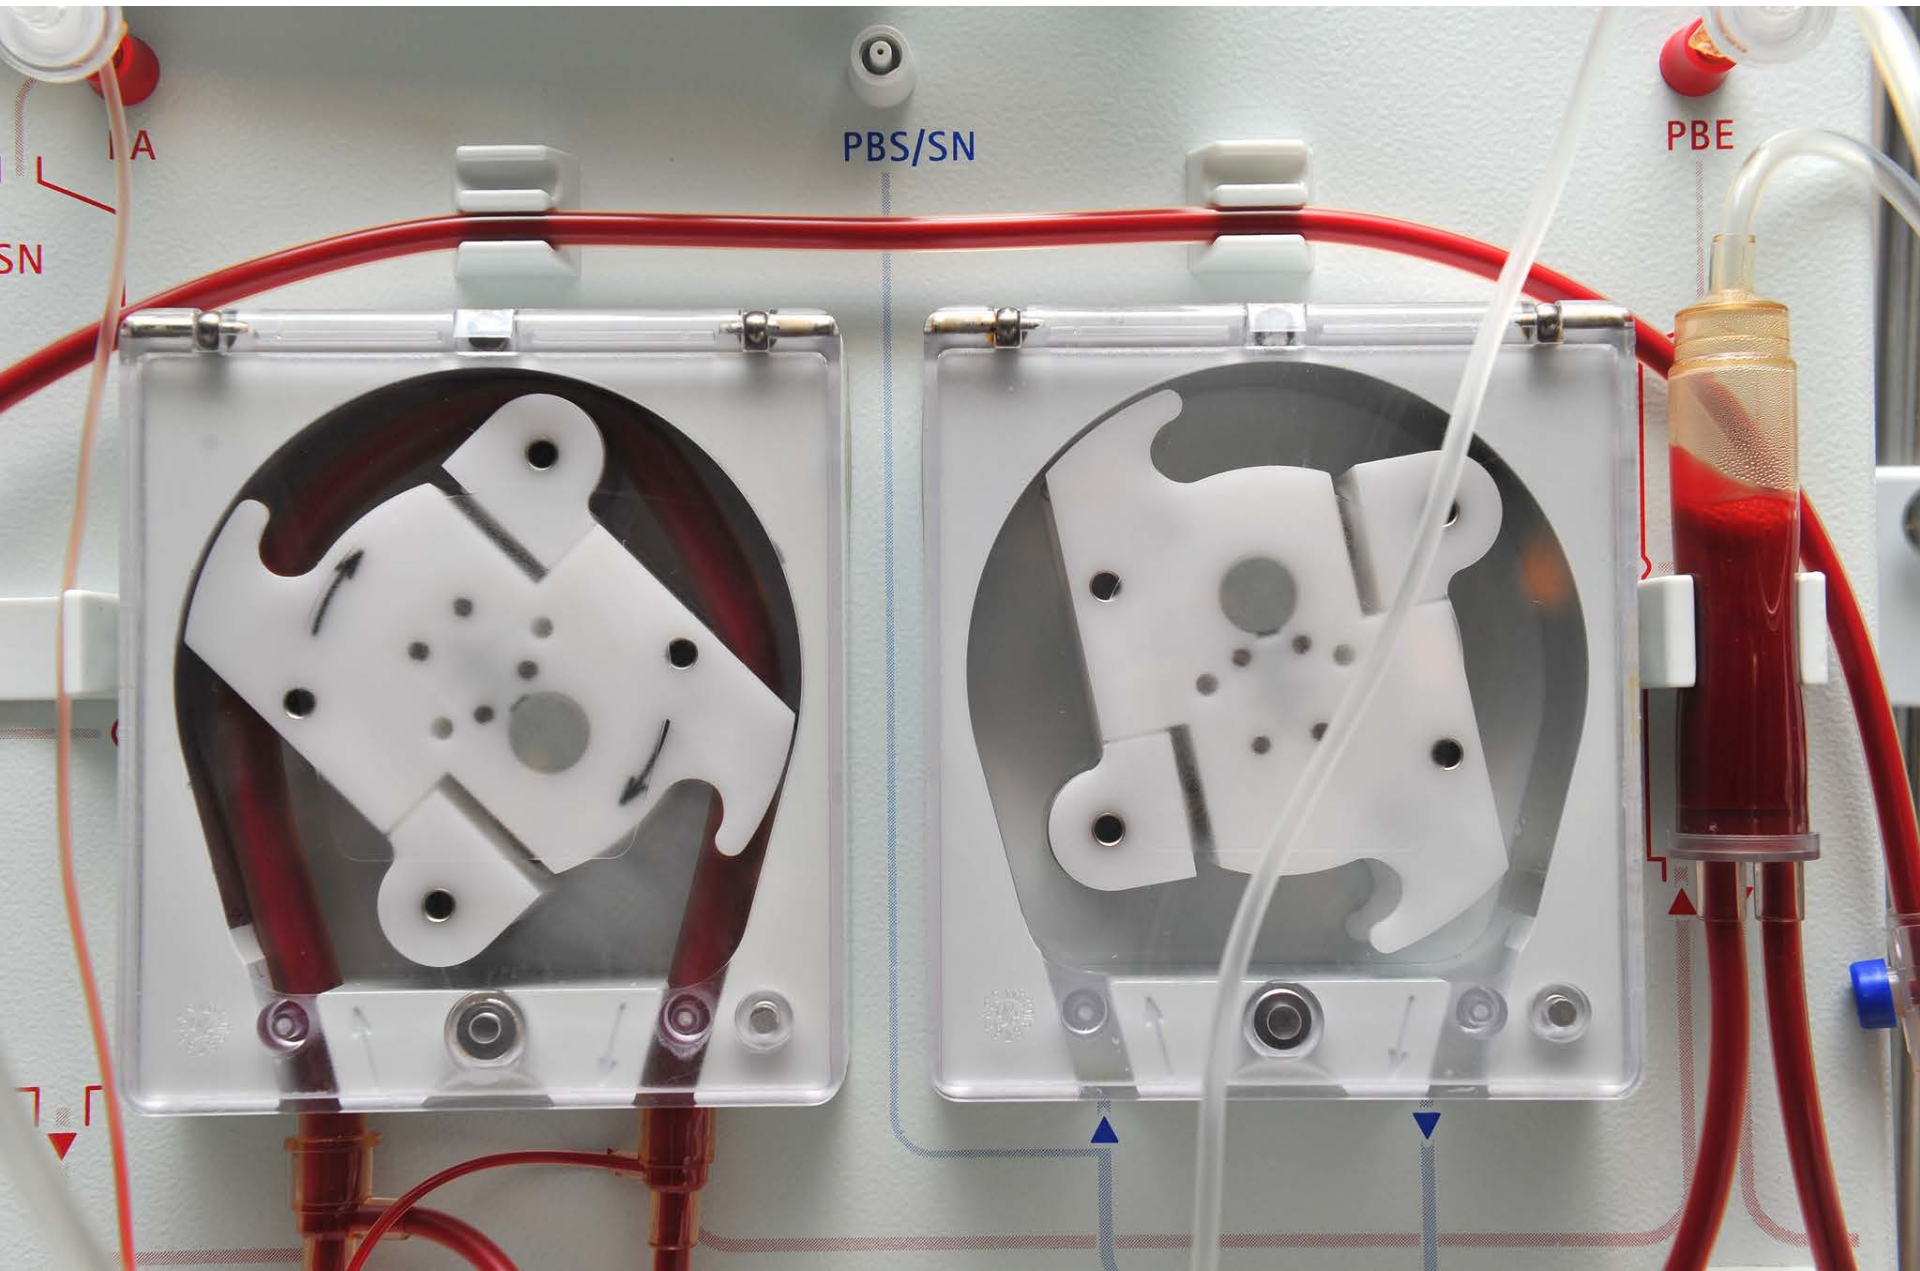

- C) A combination of A and B.
