- Impact.
- Medical conditions.
- Supports.

1.19 Am I Eligible for a Transplant?

Transplant is a possibility

... What's next?

1.21 I am Suitable for a Transplant... What's next?

I am suitable for a transplant...

What's next?

If you have a living donor, transplant surgery will be arranged when your kidneys start to fail (usually at GFR 15 or less).

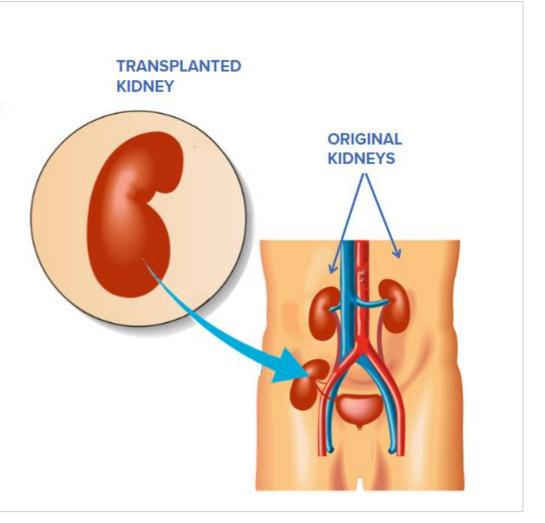

If no living donor is involved, you will be put on the deceased donor waitlist when you start on dialysis.

1.22 What Does the Surgery Involve?

What does the surgery involve?

- Surgery takes 3-5 hours.
- Stay in hospital 5-7 days.

1.23 What happens after Surgery?

What happens after surgery?

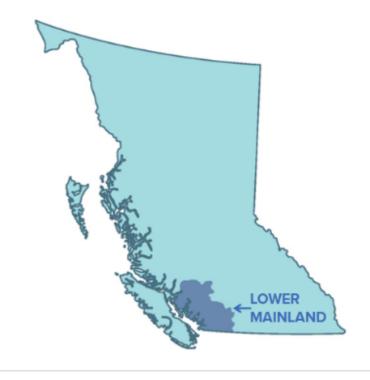

You visit the Transplant Centre:

- Twice a week for the first month.
- Once a week for 2 months.
- Frequency of visits will decrease over time.

1.24 What happens after Surgery?

If you live outside the Lower Mainland

Move to Vancouver for **2-3 months** after your transplant.

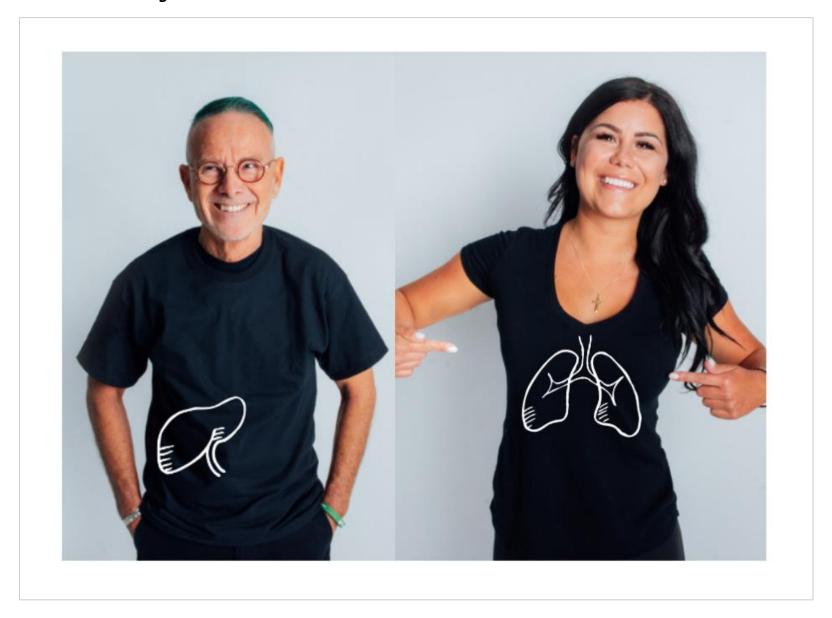

Your social worker can help with planning.

Post Transplant Clinic closer to your home.
