

PRA Itch Cream

(Menthol 0.25% / camphor 0.25% in Glaxal Base®)

What It Does:

PRA itch cream help to decrease the itch sensation and moisturizes the skin.

How It Works:

Moisturizing cream, like Glaxal Base, help to keep the skin moist and decrease the itching sensation. Menthol and camphor are also anti-itch agents by their cooling effect.

How and When to Take It:

Take as directed. Commonly, you may need to apply 2 to 3 times per day to control the itch, but everyone responds differently. The best time to apply the cream is just after bathing when your skin is still wet.

What to Do If You Miss a Dose:

If you miss an application, apply the cream as soon as you remember.

Possible Side Effects:

The most common side effects are skin irritation, and rash. If this occurs, do not take any more and contact your doctor.
