

Glaxal Base Moisturizing Cream

What it does:

Glaxal Base helps reduce the feeling of itchiness by moisturizing the skin.

How it works:

When applied, Glaxal Base reduces water loss from skin to help keep it moist and decrease the feeling of itchiness.

How to use it:

Take as directed by your health care team. Commonly, you may need to apply 2 to 3 times per day to control the itch, but everyone responds differently. The best time to apply the cream or lotion is just after bathing or a shower when your skin is still wet.

What to do if you miss a dose:

Apply the cream as soon as you remember and continue with your usual schedule.

Possible side effects:

Side effects are rare; if you experience skin irritation or a rash, stop applying Glaxal Base and contact your doctor or pharmacist.
